

End-cap Booth Agreement

Thank you for your purchase of an End-cap booth at the upcoming VMX event! This document is to ensure that you have everything you need before you start designing your booth. It is imperative you follow the IAEE Booth Rules and Regulations as outlined on this document. Please carefully review the graphic below.

End-cap Booth

An End-cap configuration is essentially an in-line (linear) booth placed in the position of a Peninsula or Split Island. For shows that have Line-of-Sight rules and not cubic content, this configuration must follow the dimensions below. For shows that have cubic content rules, the space may be used without restriction.

Dimensions

End-cap Booths are generally 10ft (3.05m) deep by 20ft (6.10m) wide. The maximum back wall height allowed is 8ft (2.44m) and the maximum back-wall width allowed is 10ft (3.05m) at the center of the back-wall with a maximum 5ft (1.52m) height on the two side aisles. Within 5' of the 2 side aisles, the maximum height for any display materials is 4'.

By electronically signing the rules and regulations, you understand and acknowledge your responsibility for your booth layout.

We ask that you download a copy of these regulations for your records. As always, you can contact us at Expo@NAVC.com with any questions.
